# Bitter Gourd

## AAKASH (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Attractive dark green, continuous pointed & flexible spine  
 length 20-25 cm,  
 width 4-5 cm  
**Fruit Weight** : 150-160 gm  
 - *High yielder & consistent performer*

## VNR-NT 77 (F1-HYBRID)

**First Harvest** : 42-45 days  
**Fruit** : Attractive dark green glossy, spiny  
 length 22-25 cm,  
 width 4-4.5 cm  
**Fruit Weight** : 130-150 gm  
 - *Very early hybrid*  
 - *Prolific fruit bearing*

## NANDITA (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Attractive dark green glossy fruits with blunt spines  
 length 20-22 cm,  
 width 3.5-4.5 cm  
**Fruit Weight** : 120-140 gm  
 - *Good crop longevity*  
 - *Good keeping quality*

## YUVRAJ (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Dark green glossy fruits with pointed spines  
 length 22-25 cm,  
 width 3.5-4.5 cm  
**Fruit Weight** : 130-150 gm  
 - *Very early hybrid*  
 - *Early bulker & short picking interval*

## SAGAR (F1-HYBRID)

**First Harvest** : 52-58 days  
**Fruit** : Dark green, continuous blunt spine  
 length 15-20 cm,  
 width 5-6 cm  
**Fruit Weight** : 100-110 gm  
 - *Attractive fruit shape & spine pattern*

## VNR-22 (F1-HYBRID)

**First Harvest** : 55-60 days  
**Fruit** : Green, non-continuous pointed spine  
 length 15-20 cm,  
 width 5-6 cm  
**Fruit Weight** : 120-130 gm  
 - *Early bulker*  
 - *Good vine longevity*

## NAVDHAN (F1-HYBRID)

**First Harvest** : 55-60 days  
**Fruit** : Attractive dark green, profuse pointed tough spine  
 length 14-18 cm,  
 width 4.5-5 cm  
**Fruit Weight** : 125-130 gm  
 - *Continuous fruiting*  
 - *Very good keeping quality*

## SHREYA (F1-HYBRID)

**First Harvest** : 50-52 days  
**Fruit** : Green, non-continuous blunt spine  
 length 20-25 cm,  
 width 5-6 cm  
**Fruit Weight** : 135-145 gm  
 - *High yield potential*

## VNR-NT 222 (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Attractive dark green, pointed hard spine  
 length 18-20 cm  
 width 4-4.5 cm  
**Fruit Weight** : 110-120 gm  
 - *Very good for long distance transportation*

## VNR-28 (F1-HYBRID)

**First Harvest** : 47-50 days  
**Fruit** : Green, non-continuous pointed spine  
 length 6.5-7.5 cm,  
 width 4-4.5 cm  
**Fruit Weight** : 30-40 gm  
 - *Early hybrid with short picking interval*  
 - *Good cooking quality & excellent taste*

## VNR-KANHAIYA (F1-HYBRID)

**First Harvest** : 45-47 days  
**Fruit** : Green, non-continuous pointed attractive spine  
 length 7-8.5 cm,  
 width 3.5-4.5 cm  
**Fruit Weight** : 35-45 gm  
 - *Early hybrid*  
 - *Excellent taste & fruit colour*

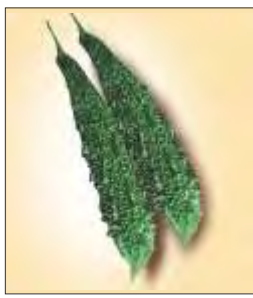

## SUNNY (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Attractive dark green glossy, smooth spine  
 length 12-15 cm,  
 width 3.5-4.0 cm  
**Fruit Weight** : 80-100 gm  
 - *Good fruit uniformity & maintains size*

# Bitter, Bottle & Sponge Gourd

**AMBER**  
(F1-HYBRID) New Hybrid

**First Harvest** : 40-45 days  
**Fruit** : Dark green, blunt spine  
 length 20-22 cm,  
 width 4-4.5 cm  
**Fruit Weight** : 100-120 gm  
 - *Early hybrid & early bulker*  
 - *Very high yield potential*

**ASHA**  
(F1-HYBRID) New Hybrid

**First Harvest** : 50-55 days  
**Fruit** : Green, pointed spine  
 length 18-20 cm,  
 width 4.5-5 cm  
**Fruit Weight** : 110-120 gm  
 - *Attractive spine pattern & uniform fruits*  
 - *Extended harvest variety*

**VNR 44**  
(F1-HYBRID) New Hybrid

**First Harvest** : 45-50 days  
**Fruit** : Dark green, pointed spine  
 length 18-20 cm,  
 width 4-4.5 cm  
**Fruit Weight** : 100-120 gm  
 - *Early hybrid*  
 - *Uniform fruit shape*

**AKSHAY**  
(F1-HYBRID)

**First Harvest** : 55-60 days  
**Fruit** : Dark green, smooth  
 continuous tubercles  
 length 25-30 cm,  
 width 4-4.5 cm  
**Fruit Weight** : 150-160 gm  
 - *Smooth continuous tubercles*  
 (*Jhalri segment*)

**AISHWARYA**  
(F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Attractive white color fruit,  
 non-continuous blunt tubercles  
 length 20-25 cm,  
 width 5-5.5 cm  
**Fruit Weight** : 140-150 gm  
 - *Short picking interval with*  
*extended harvest variety*

**IMP KATAHI**

**First Harvest** : 58-63 days  
**Fruit** : Dark green,  
 continuous pointed spine  
 length 16-22 cm,  
 width 5-6 cm  
**Fruit Weight** : 125-135 gm  
 - *Good for distant transportation*

**SARITA**  
(F1-HYBRID)

**First Harvest** : 60-65 days  
**Fruit** : Green, elongated  
 length 35-40 cm,  
 width 7-9 cm  
**Fruit Weight** : 1-1.25 kg  
 - *Prolific bearer*  
 - *Uniform fruit size*

**HARUNA**  
(F1-HYBRID)

**First Harvest** : 42-47 days  
**Fruit** : Parrot green, long, smooth  
 length 25-30 cm,  
 width 6.5-7.5 cm  
**Fruit Weight** : 700-800 gm  
 - *Very early hybrid*  
 - *Attractive fruit colour*

**RANJHA**  
(F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Bulb shaped, light green  
 length 20-22 cm,  
 width 13-15 cm  
**Fruit Weight** : 600-800 gm  
 - *Good keeping quality.*

**ALOK**  
(F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Dark green fruit  
 length 20-25 cm  
**Fruit Weight** : 100-150 gm  
 - *Early & profuse fruit set*  
 - *More number of pickings*

**ANITA**  
(F1-HYBRID) New Hybrid

**First Harvest** : 40-45 days  
**Fruit** : Green  
 length 24-26 cm,  
 width 3-3.5 cm  
**Fruit Weight** : 120-150 gm  
 - *Early bulker*  
 - *Uniform fruit shape*

**VNR 103**  
(F1-HYBRID) New Hybrid

**First Harvest** : 50-55 days  
**Fruit** : Dark green  
 length 22-24 cm,  
 width 3-3.5 cm  
**Fruit Weight** : 120-150 gm  
 - *Good crop longevity*  
 - *Maintain fruit shape through*  
*successive picking*

# Pumkin, Ridge, Ash & Snake Gourd

## AARTI (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Attractive green  
length 25-30 cm,  
Avg. width 2.4 cm  
**Fruit Weight** : 200-225 gm  
- Uniform fruit quality  
- Extended harvest variety

## VNR 102 (F1-HYBRID)

New Hybrid

**First Harvest** : 50-55 days  
**Fruit** : Dark green  
length 20-25 cm,  
width 4-4.5 cm  
**Fruit Weight** : 200-250 gm  
- Uniform fruit shape & colour  
- Field tolerant to Luteo virus

## VNR AG (F1-HYBRID)

**First Harvest** : 80-110 days  
**Fruit** : Green with white ash,  
smooth, cylindrical  
length 25-30 cm,  
width 20-25 cm  
**Fruit Weight** : 6-8 kg  
- Uniform big fruits size with thick flesh

## VNR-AG LONG (F1-HYBRID)

**First Harvest** : 90-110 days  
**Fruit** : Green with white ash,  
Smooth, cylindrical  
length 35-40 cm,  
width 20-25 cm  
**Fruit Weight** : 6-8 kg  
- Suitable for distant transportation

## VNR-P4 (F1-HYBRID)

**First Harvest** : 75-80 days  
**Fruit** : Flat round,  
yellowish orange flesh  
**Fruit Weight** : 4-5 kg  
- Maintains fruit size in successive pickings  
- Continuous fruit bearing  
- Higher vine longevity

## ANUJ (F1-HYBRID)

New Hybrid

**First Harvest** : 75-80 days  
**Fruit** : Flat round,  
cream to yellow flesh  
**Fruit Weight** : 4-6 kg  
- Continuous fruit bearing  
- Uniform fruit shape

## VNR P-6 (F1-HYBRID)

**First Harvest** : 90-100 days  
**Fruit** : Flat round,  
cream to yellow flesh  
**Fruit Weight** : 7-8 kg  
- Good vine longevity

## VNR-14 (F1-HYBRID)

**First Harvest** : 100-110 days  
**Fruit** : Flat round,  
cream to yellow flesh  
**Fruit Weight** : 8-9 kg  
- Suitable for distant transportation

## VNR-11 (F1-HYBRID)

**First Harvest** : 100-110 days  
**Fruit** : Oval fruit,  
yellow to orange flesh  
**Fruit Weight** : 8-10 kg  
- Good shelf life of the matured fruits

## DEV (F1-HYBRID)

New Hybrid

**First Harvest** : 75-80 days  
**Fruit** : Round shaped with ribbings  
yellow flesh  
**Fruit Weight** : 6-8 kg  
- Good in taste  
- Good keeping quality

## JUMBO (F1-HYBRID)

New Hybrid

**First Harvest** : 85-90 days  
**Fruit** : Oval shape,  
cream to yellow flesh  
**Fruit Weight** : 8-10 kg  
- Uniform fruit shape & colour  
- Higher vine longevity

## MEENA (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Whitish green  
length 28-32 cm,  
width 5-7 cm  
**Plant Yield** : 8 to 10 fruits per plant  
- Long harvest window  
- Odourless fruits

# Okra, Tinda, Cucumber, Water Melon, Radish & Papaya

## VNR-999 (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Dark green with 5 ridges

- Field tolerant to Yellow Vein Mosaic Virus
- Attractive tender green fruits
- Easy picking
- Good keeping quality

## DEEPIKA (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green with ridges

- Profuse branching
- Shorter inter-node distance
- Good fruit weight

## ALIA (F1-HYBRID)

**New Hybrid**

**First Harvest** : 40-45 days  
**Fruit** : Dark green with ridges

- High secondary branches
- Good crop longevity
- High yield potential

## SUPER GREEN

**First Harvest** : 50-55 days  
**Fruit** : Green with 5 ridges

- Attractive tender green fruits

## SOURABH

**First Harvest** : 50-55 days  
**Fruit** : Dark Green with 5 ridges

- Good fruit quality

## VNR-HYBRID TINDA (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit colour** : Light green  
**Fruit shape** : Round  
**Fruit skin** : Hairy  
length 3-5 cm,  
width 5-7 cm  
**Fruit Weight** : 120-140 gm

## KUMUD (F1-HYBRID)

**First Harvest** : 45-47 days  
**Fruit** : Green  
length 16-20 cm,  
width 2.5-4.0 cm  
**Fruit Weight** : 150-200 gm

- Desi type fruits with very good taste
- Early bulker & high yield potential

## KRISH (F1-HYBRID)

**New Hybrid**

**First Harvest** : 30-35 days  
**Fruit** : Green  
length 18-20 cm,  
width 3.5-4 cm  
**Fruit Weight** : 150-200 gm  
- Early hybrid  
- Desi type, crisp fresh fruits

## SUPER SWEET (F1-HYBRID)

**First Harvest** : 85-95 days  
**Fruit** : Round shaped,  
blackish green with red flesh  
**Fruit Weight** : 5-7 kg

- Very sweet in taste
- Thick rind, good for transportation

## SUGAR KING (F1-HYBRID)

**First Harvest** : 60-65 days  
**Fruit** : Oblong shaped,  
black skin, deep red pulp  
**Fruit Weight** : 2-4 kg

## WHITE LONG (F1-HYBRID)

**First Harvest** : 40-45 days  
**Colour** : Attractive white  
**Texture** : Smooth  
length 25-30 cm  
**Fruit Weight** : 600 -750 gm

- Early maturity hybrid
- Attains good size in smaller duration

## VINAYAK (PAPAYA, F1-HYBRID)

**First Harvest** : 210-240 days  
**Fruit** : Long oval  
length 20-30 cm,  
width 14-18 cm  
**Fruit Weight** : 1.5-2.5 kg

- Early hybrid & early bulker
- Deep orange flesh

# Chilli

## VNR-38 (F1-HYBRID)

**First Harvest** : 40-45 days  
**Fruit** : Light green, smooth  
 length 8 -11 cm,  
 width 2.5-3 cm  
**Pungency** : Intermediate  
 - Best suited for Achari segment  
 - Suitable for processing

## VNR-G-907 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Light green, smooth & shiny  
 length 12-14 cm,  
 width 2-2.5 cm  
**Pungency** : Medium  
 - Achari type with early first harvest  
 - Tough fruits, good for transportation

## VNR 836 (F1-HYBRID)

**New Hybrid**

**First Harvest** : 50-55 days  
**Fruit** : Green colour  
 length 14-16 cm,  
 width 2.5-2.8 cm  
**Pungency** : Medium  
 - Achari type, uniform fruit length  
 - Desi type texture with vertical depression

## VNR-S-212 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green, wrinkled smooth  
 length 9-9.4 cm,  
 width 2-2.2 cm  
**Pungency** : Medium  
 - Suitable for Bhajji segment

## GUNDU (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green, smooth  
 length 3-4 cm,  
 width 1-1.8 cm  
**Pungency** : Medium  
 - Dual purpose variety

## VNR-305 (F1-HYBRID)

**First Harvest** : 40-45 days  
**Fruit** : Green, smooth  
 length 7-8.5 cm,  
 width 1-1.2 cm  
**Pungency** : High  
 - Early hybrid with desi type tough fruits  
 - Good heat set

## SHILPA (435/7) (F1-HYBRID)

**First Harvest** : 40-45 days  
**Fruit** : Green  
 length 6-7 cm,  
 width 0.8-1.0 cm  
**Pungency** : High  
 - Early harvest hybrid  
 - Suitable for long distance transportation

## VNR-26-13 (F1-HYBRID)

**First Harvest** : 42-45 days  
**Fruit** : Green, smooth  
 length 6-8 cm,  
 width 0.9-1.1 cm  
**Pungency** : High  
 - Early hybrid with tough fruits  
 - Good cold set

## SUNIDHI (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Green  
 length 11-12 cm,  
 width 1-1.2 cm  
**Pungency** : High  
 - Tough fruits - Dual purpose variety  
 - Short picking interval

## VNR-G-203 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Dark green  
 length 9-10 cm,  
 width 1-1.1 cm  
**Pungency** : High  
 - Dual purpose variety  
 - Tough skin with good keeping quality

## VNR UNNATI (60-13) (F1-HYBRID)

**First Harvest** : 42-45 days  
**Fruit** : Uniform dark green  
 length 9-11 cm,  
 width 0.9 -1 cm  
**Pungency** : High  
 - Early hybrid  
 - Good cold and heat set  
 - Best suited for small fresh green market

## VNR 1307 (F1-HYBRID)

**New Hybrid**

**First Harvest** : 45-50 days  
**Fruit** : Dark green, smooth  
 length 9-10 cm,  
 width 1-1.1 cm  
**Pungency** : Medium  
 - Tough fruits - Umbrella canopy  
 - High yield potential

## MAJOR (VNR S-436) (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green  
 length 10-12 cm,  
 width 1-1.2 cm  
**Pungency** : High  
 - Early hybrid  
 - Good cold & heat set

## VNR-75 (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Light green  
 Avg. length 8.5 cm,  
 width 0.9-1.1 cm  
**Pungency** : High  
 - Good cold set  
 - Field tolerant to Powdery Mildew

## VCH-01 (F1-HYBRID)

**First Harvest** : 50-60 days  
**Fruit** : Light green, smooth,  
 deep red on ripening  
 length 7-8 cm,  
 width 1-1.2 cm  
**Pungency** : High  
 - Good heat set

## VNR-G-592 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green, smooth  
 length 11-13 cm,  
 width 1-1.3 cm  
**Pungency** : High  
 - Hot set variety  
 - Dual purpose hybrid

## SAHIBA (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green to light green, smooth  
 length 10-11 cm,  
 width 1.1-1.2 cm  
**Pungency** : High  
 - High glossy fruits  
 - Good for fresh green & red chilli

## CH 27 (F1-HYBRID)

New Hybrid

**First Harvest** : 45-50 days  
**Fruit** : Light green, smooth  
 length 6.5-7 cm,  
 width 1.1-1.3 cm  
**Pungency** : High  
 - Hot set variety  
 - Suitable for processing

## VNR-10 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green, smooth texture  
 length 10-12 cm,  
 width 1-1.5 cm  
**Pungency** : High  
 - Tolerant to Cercospora and Bacterial  
 Leaf Spot  
 - Suitable for distant transportation

## VNR-109 (F1-HYBRID)

**First Harvest** : 40-45 days  
**Fruit** : Light green, smooth texture  
 length 13-17 cm,  
 width 1.4-1.7 cm  
**Pungency** : Medium  
 - Early hybrid with very good heat set  
 - Umbrella canopy  
 - Short picking interval

## VNR-145 (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Parrot green,  
 smooth & shiny  
 length 12-16 cm,  
 width 1.2-1.4 cm  
**Pungency** : High  
 - Early hybrid with short picking interval  
 - Very good heat set variety

## VNR 332 (RANI) (F1-HYBRID)

Notified Hybrid

**First Harvest** : 45-50 days  
**Fruit** : Light green, smooth texture  
 length 12-14 cm,  
 width 1-1.2 cm  
**Pungency** : High  
 - Attractive smooth & shiny fruits  
 - Suitable for distant transportation

## VNR-978 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Parrot green, smooth &  
 glossy fruits  
 length 20-24 cm,  
 width 1.3-1.5 cm  
**Pungency** : High  
 - Good heat set

## VNR-1921 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Parrot green, smooth &  
 glossy fruits  
 length 16-18 cm,  
 width 2-2.5 cm  
**Pungency** : Medium  
 - Low inter-node distance  
 - High secondary branches

# Chilli & Brinjal

**VNR-277**  
(F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Light green, smooth  
 length 12-14 cm,  
 width 1-1.2 cm  
**Pungency** : High  
 - Dual purpose variety with  
 good red power quality

**VNR-VIDYA (725)**  
(F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Light green, smooth  
 length 10-12 cm,  
 width 1.2-1.4 cm  
**Pungency** : Medium  
 - Early hybrid with profuse fruit bearing  
 - Good keeping quality

**VNR-577**  
(F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Green  
 length 11-13 cm,  
 width 1.5-2.0 cm  
**Pungency** : Medium  
 - Dual purpose hybrid

**VNR 1786**  
(F1-HYBRID)

**New Hybrid**

**First Harvest** : 80-90 days  
**Fruit** : Dark red on ripening  
 length 14-16 cm,  
 width 1-1.1 cm  
**Pungency** : High  
 - Early first picking with wrinkled fruits  
 - Quick dry property with high dry recovery  
 - Extended harvest variety

**VNR-314**  
(F1-HYBRID)

**First Harvest** : 40-45 days  
**Fruit** : Light green, smooth  
 length 10-12 cm,  
 width 1.2-1.4 cm  
**Pungency** : High  
 - Early & hot set variety  
 - Suitable for distant transportation  
 - Short picking interval

**CHARMEE (VNR-G 303)**  
(F1-HYBRID)

**First Harvest** : 55-60 days  
**Fruit** : Light green, smooth  
 length 12-14 cm,  
 width 1-1.2 cm  
**Pungency** : Medium  
 - Good heat set  
 - Dual purpose variety

**KRISHNA (VNR-377)**  
(F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Dark purple & shiny  
 length 9-10 cm,  
 width 0.8-1.0 cm  
**Pungency** : High  
 - Attractive fruit colour  
 - Tough fruit with good keeping quality

**RAMBA**  
(F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green, smooth & shiny  
 length 15-17 cm,  
 width 1.2-1.3 cm  
**Pungency** : High  
 - Short picking interval  
 - Tough fruits, good for transportation

**UTKAL**  
(F1-HYBRID)

**First Harvest** : 42-45 days  
**Fruit** : Green variegated,  
 green calyx  
 length 10-14 cm,  
 width 5-8 cm  
**Fruit Weight** : 125-150 gm  
 - Early hybrid & early bulker  
 - Good in taste

**VNR-B5**  
(F1-HYBRID)

**First Harvest** : 42-47 days  
**Fruit** : Green variegated, round,  
 green spiny calyx  
 length 8-10 cm,  
 width 7-8 cm  
**Fruit Weight** : 100-150 gm  
 - Good cooking quality

**VNR-HARSH**  
(F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green variegated,  
 green calyx, small oval  
 length 8-9 cm,  
 width 5-6 cm  
**Fruit Weight** : 100-110 gm  
 - Cluster bearing with long harvest window

**VNR-ROMI**  
(F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green variegated, oval,  
 green calyx  
 length 8-10 cm,  
 width 6-8 cm  
**Fruit Weight** : 120-140 gm  
 - Good keeping quality

# Brinjal

## KEERTHANA (VNR 53-8) (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Green variegated, elongated  
 length 7-8 cm, width 5-6 cm  
**Fruit Weight** : 80-100 gm  
*- Prolific fruit bearing*

## KANCHI (F1-HYBRID)

**First Harvest** : 55-60 days  
**Fruit** : Light green  
 long green calyx, length 10-12 cm, width 5-7 cm  
**Fruit Weight** : 140-160 gm  
*- Prolific fruit bearing*

## PINKY (F1-HYBRID)

**First Harvest** : 50-55 days  
**Fruit** : Pink, very long, purplish calyx  
 length 25-30 cm, width 2-3 cm  
**Fruit Weight** : 100-110 gm  
*- Attractive desi type shiny fruits*

## VNR-218 (F1-HYBRID)

**Notified Hybrid**

**First Harvest** : 40-45 days  
**Fruit** : Light purple, oblong, green calyx  
 Avg. length 10 cm, width 5-6 cm  
**Fruit Weight** : 80-100 gm  
*- Good heat set  
 - Cluster bearing & high yielding*

## VNR-212 (F1-HYBRID)

**First Harvest** : 42-45 days  
**Fruit** : Dark violet oblong, purplish calyx  
 Avg. length 10 cm, Avg. width 5 cm  
**Fruit Weight** : 100-150 gm  
*- Cluster bearing & continuous fruiting*

## NAVINA (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Purple, long, green calyx  
 length 10-12 cm, width 4-5 cm  
**Fruit Weight** : 80-100 gm  
*- Less number of seeds, good in taste*

## VNR-60 (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Purple, long, purple calyx  
 length 10-12 cm, width 4-5 cm  
**Fruit Weight** : 40-60 gm

## VNR-125 (F1-HYBRID)

**First Harvest** : 50-60 days  
**Fruit** : Dark purple, oval, green calyx  
 length 13-15 cm, width 3-4 cm  
**Fruit Weight** : 80-120 gm  
*- Attractive uniform fruits  
 - Extended harvest variety*

## VNR-51 P (F1-HYBRID)

**First Harvest** : 48-55 days  
**Fruit** : Violet, elongated egg shaped  
 length 9-10 cm, width 4.5-5 cm  
**Fruit Weight** : 40-60 gm  
*- Hot set variety*

## PPC

**First Harvest** : 50-55 days  
**Fruit** : Purple, oblong with purplish calyx  
 length 8-10 cm, width 3-4 cm  
**Fruit Weight** : 40-60 gm  
*- Cluster fruiting*

## POONAM (F1-HYBRID)

**First Harvest** : 65-70 days  
**Fruit** : Black purple, oval, green calyx  
 length 14-15 cm, width 7-8 cm  
**Fruit Weight** : 250-300 gm  
*- Excellent for Bharta*

## SAMIDHA (F1-HYBRID)

**First Harvest** : 45-50 days  
**Fruit** : Light purple, oval, green smooth calyx  
 length 6-8 cm, width 5-7 cm  
**Fruit Weight** : 60-80 gm  
*- Cluster fruiting*

## VNR-51 C (F1-HYBRID)

**First Harvest :** 48-55 days  
**Fruit :** Dark shiny violet, medium elongated egg shaped length 8-10 cm, width 4-5 cm  
**Fruit Weight :** 50-70 gm  
 - Hot set variety

## MUKTA ROUND (F1-HYBRID)

**First Harvest :** 45-50 days  
**Fruit :** Dark purple, round, purple calyx length 7-8 cm, width 7-8 cm  
**Fruit Weight :** 140-160 gm  
 - Good cooking quality  
 - Continuous fruiting

## MUKTA MOTI (F1-HYBRID)

**First Harvest :** 50-55 days  
**Fruit :** Dark purple, oval, purple calyx length 10-12 cm, width 5.5-6.5 cm  
**Fruit Weight :** 100-120 gm  
 - Attractive shiny fruits

## SILIGUDI-111

**First Harvest :** 50-60 days  
**Fruit :** Reddish-purple, oval with green calyx length 10-13 cm, width 6-8 cm  
**Fruit Weight :** 90-100 gm  
 - Fruits have good keeping quality  
 - Excellent taste

## SIMRAN (F1-HYBRID)

**First Harvest:** 50-55 days  
**Fruit :** Light purple green variegated, green calyx length 7-8 cm, width 4-4.5 cm  
**Fruit Weight :** 80-100 gm  
 - Profuse bearing in clusters

## MANJUSHREE (F1-HYBRID)

**First Harvest :** 50-60 days  
**Fruit :** Purple variegated Avg. length 8.5 cm, width 6-7 cm  
**Fruit Weight :** 70-90 gm  
 - Cluster fruit bearing

## RAJGAON

**First Harvest :** 60-65 days  
**Fruit :** Purple green, oblong with light purple calyx length 12-14 cm, width 7-8.5 cm  
**Fruit Weight :** 200-250 gm  
 - Excellent for Bharta

## VNR 3357 (F1-HYBRID)

**First Harvest :** 65-70 days  
**Fruit Shape :** Round  
**Plant Type :** Semi-determinate  
**Fruit Weight :** 90-100 gm  
 - High firm fruit  
 - Good for transportation  
 - Uniform fruit weight

## VNR-3348 (F1-HYBRID)

**First Harvest :** 60-65 days  
**Fruit Shape :** Flat round  
**Plant Type :** Semi-determinate  
**Fruit Weight :** 80-90 gm  
 - Desi type green shoulder  
 - Sour in taste  
 - Heavy fruit bearer

## VNR-3335 (F1-HYBRID)

**First Harvest :** 60-65 days  
**Fruit Shape :** Flat round  
**Plant Type :** Semi-determinate  
**Fruit Weight :** 70-80 gm  
 - Sour in taste  
 - Good firmness  
 - Indented to flat desi type fruits

## JULIE (F1-HYBRID)

New Hybrid

**First Harvest :** 55-60 days  
**Fruit Shape :** Round  
**Plant Type :** Semi-determinate  
**Fruit Weight :** 80-85 gm  
 - Early bulker hybrid with high firm fruits  
 - Uniform fruit size through successive picking  
 - Good crop longevity and regeneration

## DEVI (F1-HYBRID)

New Hybrid

**First Harvest :** 60-65 days  
**Fruit Shape :** Flat round  
**Plant Type :** Semi-determinate  
**Fruit Weight :** 80-85 gm  
 - Attractive green shoulder sour fruits  
 - Extended harvest variety  
 - Maintains fruit size in successive pickings

# Tomato, Cluster Bean (Guar) & Cowpea (Barbatti)

## VNR-3171 (F1-HYBRID)

**First Harvest** : 65-70 days  
**Fruit Shape** : Oblong  
**Plant Type** : Semi-determinate  
**Fruit Weight** : 85-90 gm

- Good toughness
- Prolific fruit bearer

## MANSI

**First Harvest** : 55-60 days  
**Fruit** : Attractive light green  
 length 10-13 cm  
**Fruit shape** : Straight, erect

- Medium long tender pods
- Good cooking quality

## KASHI KANCHAN

**First Harvest** : 45-50 days  
**Fruit** : Green  
 length 25-30 cm  
**Growth Habit**: Bushy

- Early variety
- Staking is not required

## SUPHLA

**First Harvest** : 40-45 days  
**Fruit** : Whitish green  
 length 25-30 cm  
**Growth Habit**: Bushy

- Good cooking quality

## GOMCHI-1

**First Harvest** : 65-70 days  
**Fruit** : Light green  
 length 22-25 cm  
**Growth Habit**: Creeper

- Attractive fruit

## BARAMASI

**First Harvest** : 45-50 days  
**Fruit** : Light green to white  
 length 22-25 cm  
**Growth Habit**: Bushy

- Photo & Thermo Insensitive,  
 can be grown round the year

## SHWETA

**First Harvest** : 50-55 days  
**Fruit** : Whitish green  
 length 30-35 cm  
**Growth Habit**: Creeper

- Uniform long fruits &  
 attractive colour

## SHWETA-N

**First Harvest** : 55-60 days  
**Fruit** : Light green, straight  
 length 30-35 cm  
**Growth Habit**: Creeper

- Attractive fruit

## JAPANI LALDANA

**First Harvest** : 45-50 days  
**Fruit** : Dark green  
 length 38-45 cm  
**Growth Habit**: Creeper

- Early variety

## VNR CP-27

**First Harvest** : 60-65 days  
**Fruit** : Whitish green  
 length 45-50 cm  
**Growth Habit**: Creeper

- Long soft fleshy pods

## LALIMA

**First Harvest** : 45-50 days  
**Fruit** : Light reddish brown  
 length 25-28 cm  
**Growth Habit**: Creeper

- Good cooking quality

## LALITA

**First Harvest** : 45-50 days  
**Fruit** : Light reddish brown  
 length 25-30 cm  
**Growth Habit**: Bushy

- Staking is not required

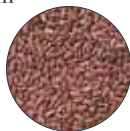

# Cowpea (Barbatti), Dolichos (Sem) & Root Stock

## JARIPA

**First Harvest** : 45-50 days  
**Fruit** : Reddish brown  
 length 45-50 cm  
**Growth Habit**: Creeper

- Good cooking quality

## BAIJANTI

**First Harvest** : 60-65 days  
**Fruit** : Reddish brown  
 length 45-50 cm  
**Growth Habit**: Creeper

- Long harvest window

## BAUNI

**First Harvest** : 65-70 days  
**Fruit** : Light green, straight  
 length 13-15 cm,  
 width 0.7-1 cm

**Growth Habit**: Bushy  
 - Continuous fruit bearing  
 - Staking is not required

VNR-BAUNI

## PAIRY

**First Harvest** : 50-55 days  
**Fruit** : Green  
 length 16-20 cm,  
 Avg. width 1.8 cm

**Growth Habit**: Bushy  
 - Flat pod sem variety  
 - Staking is not required

VNR-PAIRY

## SEM-3

**First Harvest** : 65-70 days  
**Fruit** : Green, flattened  
 length 10-12 cm,  
 Avg. width 2.4 cm

**Growth Habit**: Viny  
 - Prolific bearer  
 - Long harvest window

## GOMCHI GREEN

**First Harvest** : 60-65 days  
**Fruit** : Green  
 length 8-10 cm

**Growth Habit**: Semi pole type  
 - Attractive fruit colour  
 - Offseason fruiting

## SUPER WONDER

**First Harvest** : 50-55 days  
**Fruit** : Dark green  
 length 8-10 cm,  
 width 6-7.5 cm

**Fruit Weight** : 150-200 gm  
 - Strong and vigorous plant  
 - Good shelf life and transportability

## MUSKAN

**First Harvest** : 35-40 days  
**Colour** : Dark green  
**Bolting** : Late Bolting

- Multi cut  
 - Hot set variety  
 - Suitable for round the year planting  
 - Good aroma

## MAXIMO (F1-HYBRID)

- Hybrid pumpkin root stock  
 - Resistance to Fusarium Wilt  
 - Cold tolerance  
 - Salt tolerance  
 - Suitable for cucurbit grafting

## LAGESI (F1-HYBRID)

- Hybrid bottle gourd root stock  
 - Resistance to Fusarium Wilt  
 - Cold tolerance & Salt tolerance  
 - Suitable for water melon and round melon grafting

## Vegetable Grafting: Solanaceae

## Vegetable Grafting: Cucurbits

### VNR 2111 (F1-HYBRID)

- Extra early hybrid. Crop duration: 100-105 days
- Dwarf plants with strong stem
- More productive tillers per plant
- More filled grains per panicle
- Medium slender grain
- Suitable for low rainfall area

### VNR 2222 (F1-HYBRID)

- Crop duration: 110-115 days
- More productive tillers per plant
- Dwarf plants with strong stem
- More filled grains per panicle
- Medium slender grains
- 15-20% more yield than the similar duration varieties

### VNR 2233 (F1-HYBRID)

- Crop duration : 115-120 days
- Highly fertile panicles with long bold grain
- Intermediate height with strong stem
- 15-20% more yield than the similar duration varieties
- Field tolerance to *Blast*

### MINI BHOG (F1-HYBRID)

New Hybrid

- Crop duration : 130-135 days
- High uniform tillers
- Long panicle with more grains/tillers
- Fine grain type with quality cooking taste

### VNR 2245

Notified Hybrid

- Crop duration : 120-125 days
- Tolerant to *Bacterial Leaf Blight* (BLB)
- Medium plant height & strong stem
- Long slender grain with medium aroma
- High yield potential

### VNR 2355 Plus (F1-HYBRID)

Notified Hybrid

- Crop duration : 130-135 days
- Tolerant to *Bacterial Leaf Blight* (BLB)
- Medium height and strong stem
- More filled grains per panicle and more tillers per plant
- Medium slender and aromatic grain
- 15-20% more yield over the local varieties

### VNR 2377 (F1-HYBRID)

- Crop duration : 130-140 days
- Field tolerance to *Blast*
- Medium bold grain
- Intermediate height with strong stem
- 15-20% more yield than the similar duration varieties

### VNR LAXMI Plus (F1-HYBRID)

- Crop duration : 145-150 days
- Medium bold grain
- Intermediate height with strong stem
- 15-20% more yield than the similar duration varieties

### VNR SHINEY (RESEARCH VARIETY)

- Crop duration : 110-115 days
- Short height, strong stem
- More grains per tiller and high yield
- Long slender and aromatic grains similar to Basmati
- Good in taste

### VNR SONARI (RESEARCH VARIETY)

- Crop duration : 125-130 days
- Tolerant to *Gall Midge*
- Strong stem
- More grains per tiller and easy miling
- Short slender grain, with good taste

## Cereals- Maize

### VNR 4226 (F1-HYBRID)

- Crop duration : 100-105 days in Kharif
- Intermediate height with medium cob placement
- Uniform cobs with Orange-yellow semi flint grains
- Good performance even under water stress conditions
- High yielding variety suitable for areas from medium to low fertile soils

### VNR 4266 (F1-HYBRID)

- Crop duration : 100-105 days
- Only Kharif hybrid
- Medium plant height
- Big, uniform cob with medium cob placement
- Orange flint grains, excellent tip filling
- High yield potential

### VNR 4343 (F1-HYBRID)

- 105-110 days seed to seed in Rainy season
- Attractive Orange flint grains
- Tall sturdy plants
- Medium cob placement and good tip fill
- High yielding hybrid

### VNR 4388 (F1-HYBRID)

- A very stable hybrid with medium maturity 105-110 days in Kharif
- Broad robust & tip filled cobs
- Orange flint grains with good shelling percentage
- Good drought tolerance
- High yield potential

### VNR 4001 (F1-HYBRID)

- Crop Duration : 105-110 days
- High yields even in fields with limited water availability
- Yellow orange semi flint grains with higher adaptability
- Suitable for Kharif season sowing
- High yield potential

## Cereals- Maize & Bajra

### VNR 4307 (F1-HYBRID)

New Hybrid

- Crop Duration : 105-110 days
- Suitable for Kharif season sowing
- Uniform medium sized cobs
- Attractive yellow orange semi flint grains
- High yield potential with compact high shelling grains
- Moderate tolerant to *Stalk Rot* & leafy diseases

### VNR 4550 (F1-HYBRID)

New Hybrid

- Crop Duration : 135-165 days
- Suitable for Rabi season sowing
- Attractive yellow orange semi flint grains
- Uniform cobs with good husk cover
- High yield potential with stout cobs

### VNR 3232 (F1-HYBRID)

- Crop duration : 70-75 days
- Compact ear head
- More effective tillers
- Stay green fodder quality
- Tolerant to *Downy Mildew* & *Rust*
- High yield potential
